OBJECTIVE

Aspiring Java Backend Developer with hands-on project development experience and a foundation in Core Java, Object-Oriented Programming, Spring Boot, REST APIs, and relational databases. Interested in building secure, maintainable, and scalable applications, applying problem-solving skills, and contributing to backend engineering teams.

EDUCATION

Bachelor of Technology 2020 – 2024
Netaji Subhash Engineering College, Kolkata
Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, and Software Engineering.

TECHNICAL SKILLS

Programming Languages	Java, JavaScript, SQL, C++
Java Fundamentals	OOP, Collections Framework, Exception Handling, Classes and Objects, Inheritance, Polymorphism, Abstraction, Encapsulation
Backend Development	Spring Framework, Spring Boot, REST APIs, Dependency Injection, Inversion of Control
Data Access	JDBC, JPA, Hibernate, Spring Data JPA
Databases	PostgreSQL, MySQL, Relational Database Concepts, SQL Queries
Caching and Sessions	Redis, Session Management
Frontend and Mobile	React Native, TypeScript, Next.js
State Management	Zustand
Tools	Git, GitHub, Gradle, Postman, Visual Studio Code
Computer Science	DSA, DBMS, Operating Systems, Computer Networks

PROJECTS

VastraVibe – Textile E-commerce Application Dashboard — Mobile App — Backend

- Developing a textile e-commerce platform with a React Native mobile application, a web dashboard, and a Spring Boot backend.
- Developing backend functionality using Java and Spring Boot, with REST APIs for communication between application clients and backend services.
- Working with PostgreSQL for relational data storage and Redis for session-related functionality.
- Implementing user authentication workflows, including signup, login, session validation, and logout.
- Organizing backend components into controllers, services, repositories, and entities to separate API handling, business logic, and data access.
- Using Git and GitHub to manage source code across the mobile, dashboard, and backend repositories.

RodbezOperator – Driver and Operator Application

- Worked on a React Native application designed to support driver and operator workflows.
- Integrated backend APIs for authentication and retrieving application-related user information.
- Used Zustand for application state management and developed reusable UI components and navigation flows.
- Worked on location tracking and background location updates for driver-related functionality.
- Worked with mobile application permissions, API integration, and application state handling.
